Temporary traffic lights at B1508 St Edmunds Hill, south of Workhouse Green

5 - 7 November, 29 November - 8 December and 14 - 18
December (09:00-16:00)

National Grid is getting ready for the main construction phase of the [Bramford to Twinstead Reinforcement](#). In preparation for this, we need to build a new, widened site entrance (known as a bellmouth) so vehicles can safely access our working areas.

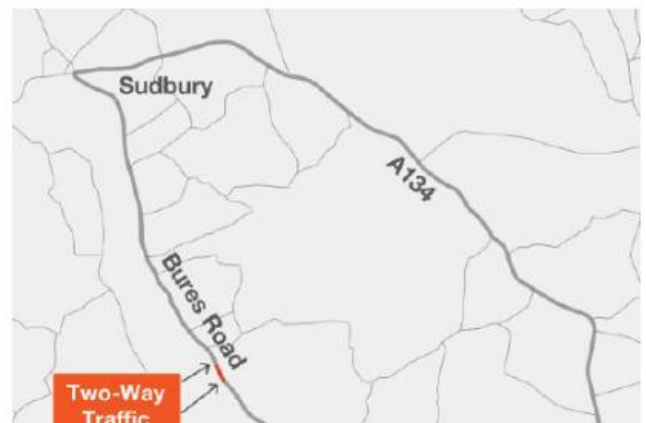

Where? B1508 St Edmunds Hill,
south of Workhouse Green

When? 5 - 7 November
29 November - 8 December
14 - 18 December
Between 09:00 and 16:00

We previously wrote to let you know about two sets of part-time road closures planned on B1508 St Edmunds Hill in September and October 2026. The first closure went ahead as planned, but many of you told us that you wanted us to explore alternatives, such as temporary traffic lights, to reduce disruption.

We're pleased to confirm that, because of vegetation management works completed during the first closure, the remaining works will now take place using temporary traffic lights and no further closure will be required at

lights and no further closure will be required at this time.

This means that, on select dates in November and December 2026, two-way traffic lights will be in place south of Spout Lane between 09:00 and 16:00. The lights will be removed outside of these hours. We will display advance warning signs and clearly mark the work area prior to the works.

Details of the temporary traffic lights are also available on the '[What's happening now?](#)' page of our website. You can also find the exact location on [What3Words](#).

We apologise for the disruption this may cause. Our team will work hard to finish these activities as safely and quickly as possible.
